<b>If Paying After 01/14/2023 Pay</b>	159.41
<b>Amount Paid</b>	

- 1** Number of solar panels in member's subscription.
- 2** Number of kWh produced by member's panels.
- 3** **KWH CHARGE:** Total kWh used multiplied by the standard residential rate. In this example, the member used 769 kWh. (Note: 12.375 cents/kWh is the rate for the first 500 kWh used. The cost of kWh 501-1,000 is 11.92 cents/kWh and the cost of kWh over 1,000 is 10.26 cents/kWh.)
- 4** **DISTRIBUTION CHARGE:** Fixed cost to deliver electricity to residential co-op members. Includes meters, poles, transformers, wire, and other equipment needed to maintain the system.
- 5** **WHOLESALE POWER ADJ:** Total kWh used (traditional and solar) multiplied by the Wholesale Power Adjustment (W.P.A.), which is the variable monthly cost to produce electric power. In this example, the W.P.A. is 0.008 cents/kWh. (SEE BOX A)
- 6** **OS PRODUCTION CHARGE:** Total kWh produced by the co-op member's solar panels multiplied by the OurSolar rate of 13.575 cents/kWh.
- 7** **OS POWER PLANT CREDIT:** Total kWh produced by the co-op member's solar panels multiplied by the standard residential rate of 12.375 cents/kWh. **Note that this line is a CREDIT to the member's account, not a charge.**

Updated 12/15/22 TLG

**THE DIFFERENCE BETWEEN NUMBERS 6 AND 7 IS THE ADDITIONAL AMOUNT THE MEMBER PAYS FOR THE POWER PRODUCED BY THEIR SOLAR PANELS.** In this example, the member is being billed \$6.00 extra for the power produced by the 10 panels in their subscription. The amount billed will vary each month based on the number of panels the member is subscribed to and the amount of energy the panels have produced, which depends greatly on weather conditions.
